# Welcome to Chordasy

## Introduction

### Welcome to Chordasy

Chordasy is a powerful digital platform designed for musicians, worship teams, and bands to organize, share, synchronize, and perform chord charts with ease.
Whether you're preparing for a rehearsal, leading worship, or performing live on stage, Chordasy helps keep your music resources organized and accessible.

### Why Chordasy?

Traditional chord charts can be difficult to manage. Musicians often face challenges such as multiple chart versions, last-minute song changes, and sharing updates across a team.
Chordasy solves these challenges by bringing your chord charts, setlists, team communication, and collaboration tools together in one easy-to-use platform.

### Designed for Musicians

Chordasy is designed to keep everything within easy reach, allowing musicians to focus on playing, leading worship, and performing with confidence instead of managing files, folders, and paperwork.
Making music together should be simple, collaborative, and inspiring. 🎵

# Welcome to Chordasy

## Introduction

### Refer to the following chapters for detailed instructions:

| Chapter | Title | Page |

Setlist
↓
Band Mode (Optional)
↓
Live Performance (Optional)

## Get Started in Less Than 1 Minute

Welcome to Chordasy! Follow these simple steps to start managing and sharing your chord charts.

### Step 1 – Cloud Storage / Local Storage

Open Settings → Cloud Services
Connect one of the supported cloud providers:
Dropbox, Google Drive or click on library and import Chart from local Storage
Once connected, select the folder containing your chord charts.

### Step 2 – Open Chart

Tap Library from the navigation bar.
Chordasy will automatically load and display the charts stored in your selected cloud folder.
Supported formats: PDF, JPG, PNG

### Step 3 – Create Setlist

Tap Setlist.
Click New Setlist
Enter a setlist name
Add songs from your library

### Step 4 – Band Mode

Tap Band On.
Enter your display name
Tap Scan to discover other members
Connect to musicians on the same Wi-Fi network

### Step 5 – Share Charts and Messaging

Select a connected member and tap Send.

### Step 6 – Live Performance Mode

Tap Live.
Use the built-in tools: BPM Display, Click Track, Tempo Visualizer, Annotation Tools
Chart Transpose
Everything you need for rehearsals and live performances is available in one place.
You're Ready to Play! 🎵

# Welcome to Chordasy

## Key Features

### 📄 Digital Chord Charts

Store, organize, and display your chord charts digitally. Eliminate paper copies and keep your entire music library at your fingertips.

### 🎵 Setlist Management

Create, organize, and manage setlists for rehearsals, services, and live performances. Keep your team aligned with a structured song flow.

### 🔄 Real-Time Team Synchronization

Instantly synchronize charts, setlists, and updates across connected devices, ensuring every team member stays on the same page.

### 📡 Network Discovery

Automatically discover and connect with other Chordasy users on the same local network for seamless collaboration.

### 💬 Team Messaging

Communicate directly with band members through built-in messaging, making rehearsals and live events more efficient.

### ☁️ Cloud Services

Synchronize your music resources across multiple devices, back up important data, and access your charts wherever you go.

### 🎤 Designed for Live Performance

Built specifically for musicians, worship teams, and live performers, with a clean interface and quick access to essential tools during rehearsals and performances.

# Chapter 1
## Getting Started

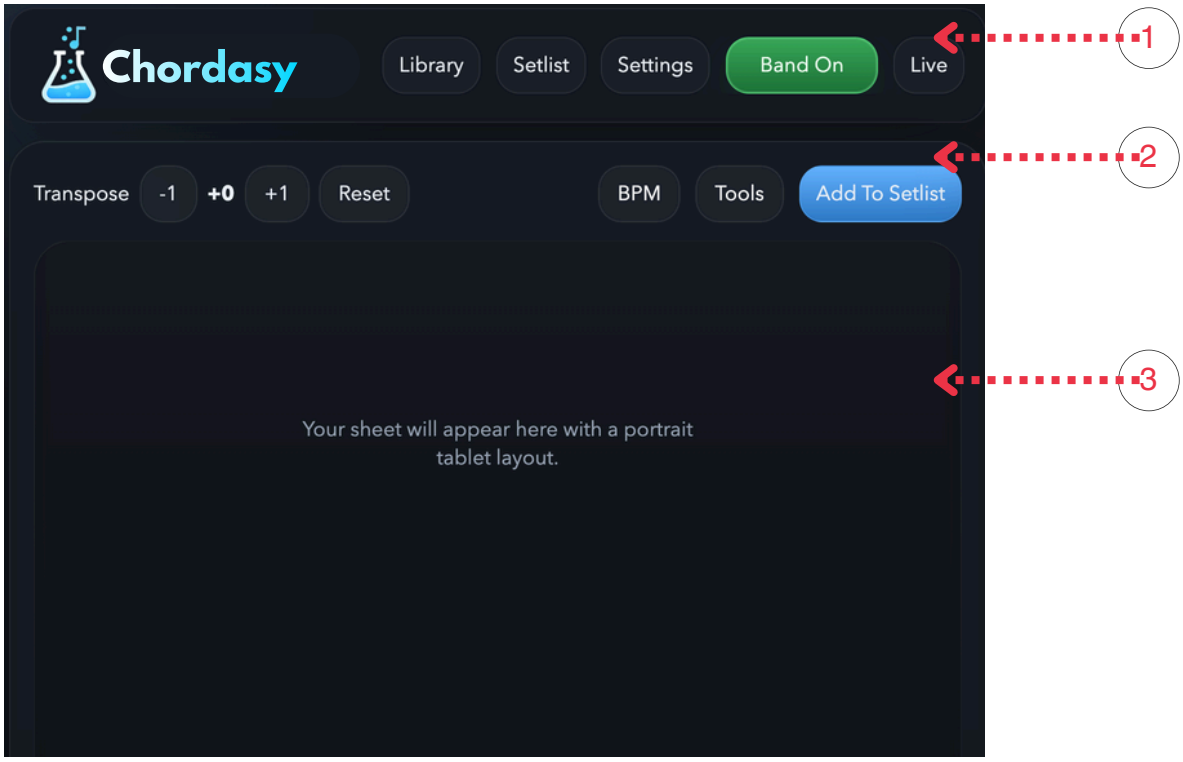

**① Navigation Bar**
The Navigation Bar provides quick access to the main areas of Chordasy.
Use these buttons to switch between:
- Library – Browse and manage your chord charts.
- Setlist – Create and organize song lists for rehearsals and live performances.
- Settings – Configure Chordasy preferences and cloud services.
- Band On – Connect and collaborate with other Chordasy members.
- Live – Enter performance mode for distraction-free viewing.

**② Quick Action Toolbar**
The Quick Action Toolbar gives you instant access to commonly used chart functions.
Available actions include:
- Transpose – Change the key of the current chord chart.
- Reset – Restore the original key.
- BPM – Set or view the song tempo.
- Tools – Access additional chart utilities.
- Add To Setlist – Add the current song directly to a setlist.

These tools are designed to help musicians make quick adjustments during rehearsals and live performances.

**③ Chart Display Area**
The Chart Display Area is where your chord charts and song sheets are displayed.
Once a chart is opened, this area provides:
- Clear and readable chart viewing
- Smooth scrolling and navigation
- Real-time updates from team members
- Optimized layout for tablets and live performance use

This is the primary workspace where musicians interact with their charts during practice, rehearsals, and services.

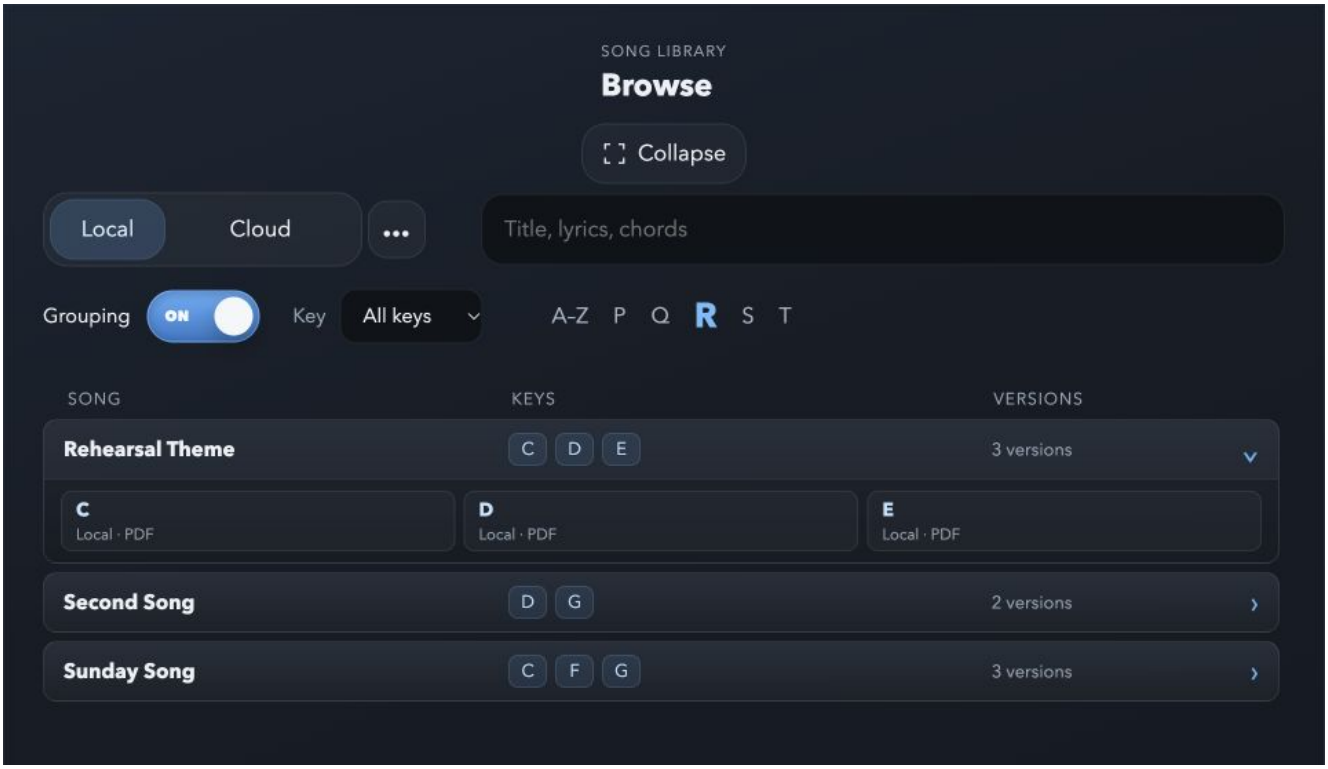

# Chapter 1

## Getting Started

### Song Library - Full-Screen Browsing

Expand Browse when you need more room to find a song. The same library can return to the compact drawer beside your chart.

Example interface with sample songs. Grouping is shown on.

#### 1. Expand or collapse Browse

Open Library > Browse and tap the expand control. Tap Collapse to return to the drawer; your library and existing chart actions remain available.

#### 2. Group matching song titles

Grouping is off by default. Turn it on in full-screen mode to show matching titles once. Tap a song title to reveal the available keys or versions, then choose the chart you need.

#### 3. Narrow the list

Combine the search field, Key filter and A-Z navigation. Key labels appear only when a key is detected. Grouping changes the view; it does not merge, rename or delete your files.

# Chapter 1
## Getting Started

## BPM & Tempo Tools
Chordasy includes a built-in BPM tool designed to help musicians maintain a consistent tempo during rehearsals and live performances.
The BPM toolbar can be opened directly from Live Mode and remains accessible while viewing chord charts.

### 🎵 BPM Display
The current BPM (Beats Per Minute) is displayed in real time.
Adjust the BPM slider to match the tempo of the song being performed.

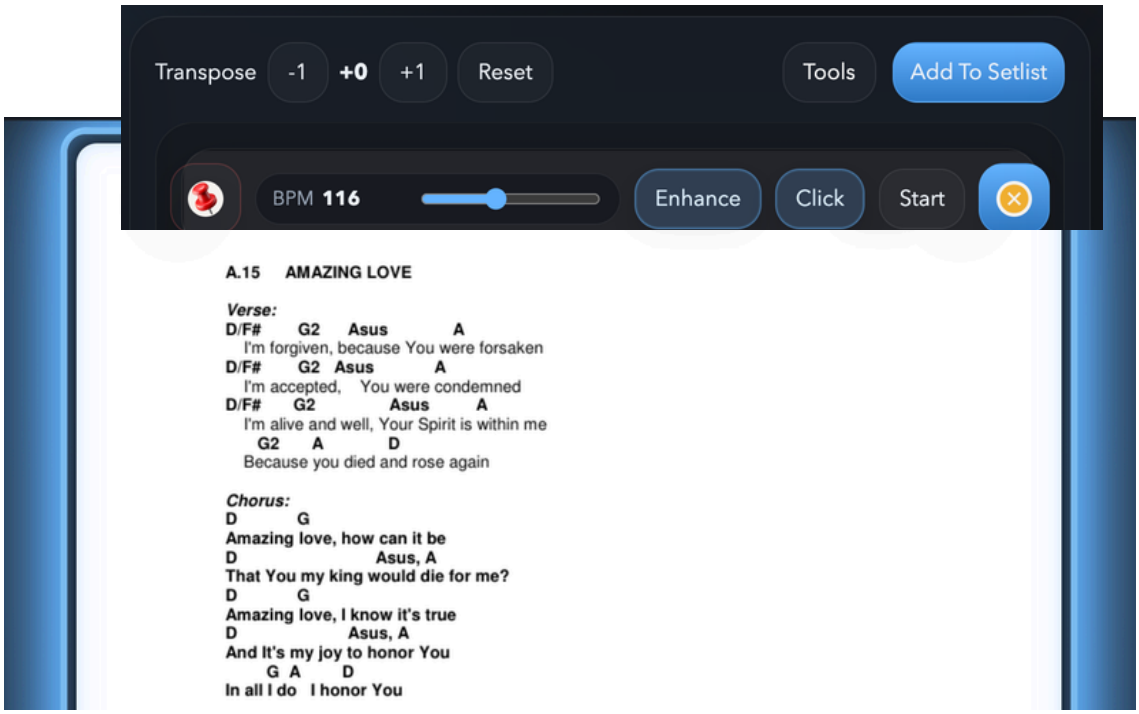

### ✨ Enhance Mode
The Enhance button activates a visual BPM indicator around the chart display area.
This provides an easy-to-follow visual tempo reference, especially useful for worship leaders, drummers, and musicians playing without a click track.

### 🥁 Click Track
The Click button enables an audible metronome.
Musicians can use the click track to maintain a steady tempo during rehearsals and performances.

### ▶ Start / ⏹ Stop
Use Start to begin the BPM visualizer and click track.
Use Stop to pause playback at any time.

### ❌ Close BPM Toolbar
Tap the close button to hide the BPM toolbar and return to normal chart viewing.

### 🎵 Performance Tip
For songs with complex arrangements or tempo-sensitive transitions, use the BPM visualizer and click track to help the entire band stay synchronized throughout the performance.

# Chapter 1

## Getting Started

## Annotation Tools

The Annotation Toolbar allows musicians to mark up chord charts directly within Live Mode.
Use these tools to highlight important sections, make performance notes, and personalize charts for rehearsals and live performances.

### ☝ Pointer Tool

Move around the chart, select text notes, or return to normal chart interaction without drawing.

### ✍ Pen Tool

Draw freely on the chart using your finger, stylus, or mouse. Perfect for adding reminders, markings, cues, or performance notes.

### 🖍 Highlighter Tool

Highlight important lyrics, chords, song sections, or transitions so key moments are easier to identify during a performance.

### T Text Tool

Add movable text notes directly onto the chart. Multiline text and emoji are supported, making it easy to add detailed instructions, lyrics, cues, or reminders.

### 🎨 Color Selection

Choose from multiple annotation colors to organize different notes and markings. Text notes use black by default, with additional color options available.

### 🧽 Eraser Tool

Remove individual drawings, highlights, or text notes without affecting the original chart.

### 🗑 Clear Annotations

Remove all annotations from the current chart with a single tap. The original PDF, JPG, or PNG file remains unchanged.

### – 100% + Zoom Controls

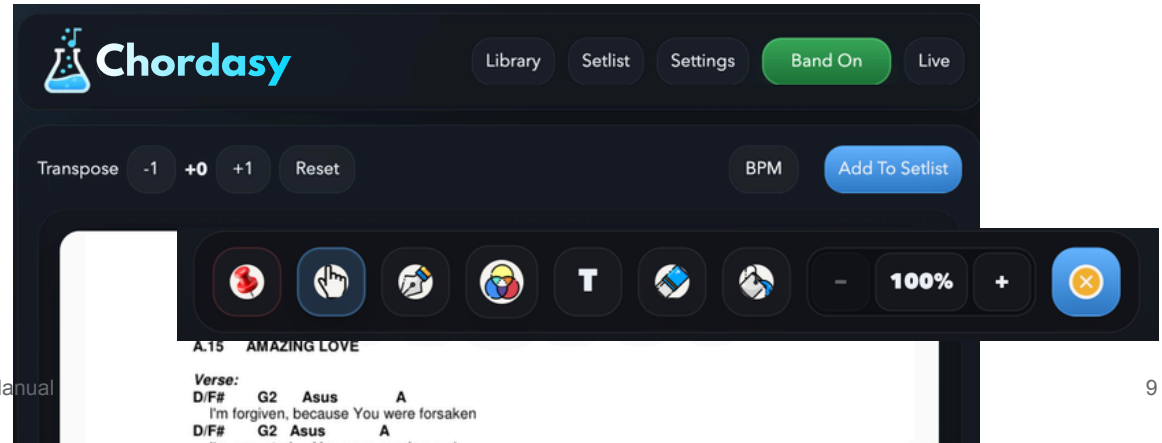

Zoom in or out to write and position annotations more accurately. Tap the percentage control to return the chart to its fitted view.

### ❌ Close Annotation Toolbar

Hide the Annotation Toolbar and return to normal chart viewing.

### 🎵 Performance Tip

Use annotations to mark song structures, key changes, repeat sections, solos, transitions, or worship cues before rehearsals and live performances. This helps musicians follow arrangements confidently without modifying the original chart.

# Chapter 2

## Cloud Services

### Connecting to Cloud Services

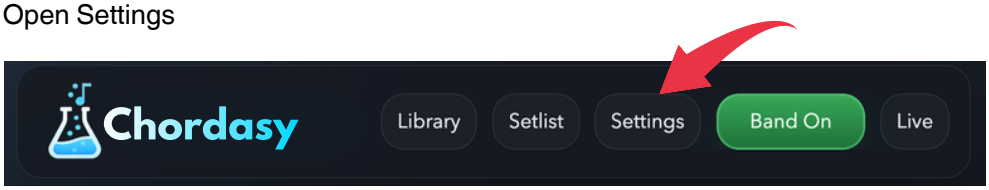

Chordasy supports cloud storage integration, allowing you to access, synchronize, and share your chord charts across multiple devices.

Benefits of Cloud Services

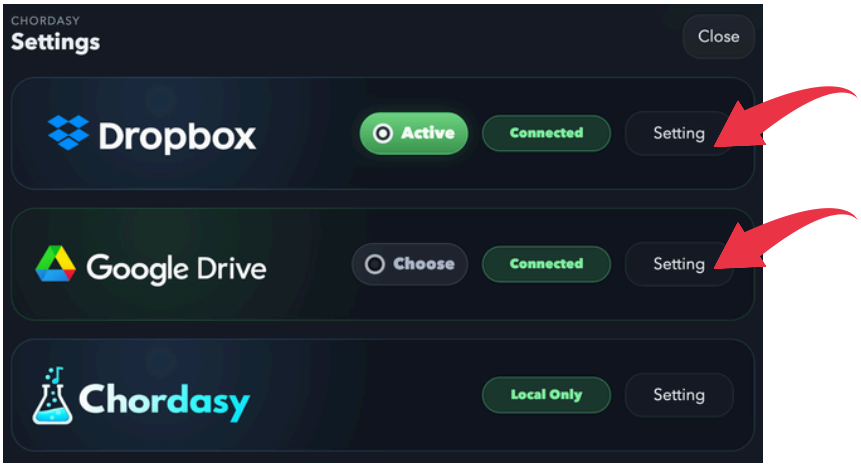

- ☁️ Cloud Storage
- 🔄 Automatic Synchronization
- 👥 Shared Team Resources
- 💾 Backup and Recovery
- 🌎 Anywhere Access

Steps:

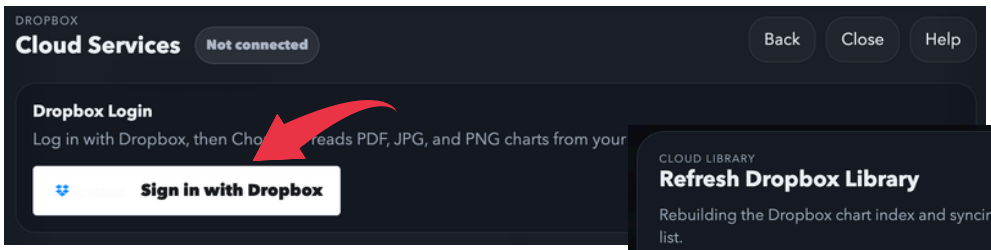

1. Open Settings

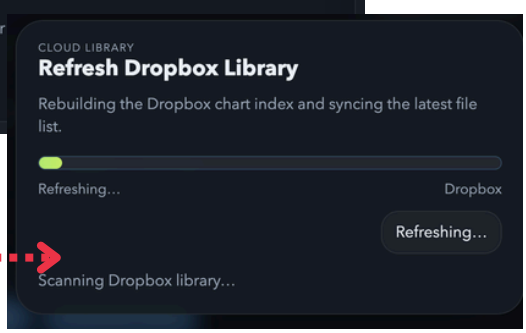

2. Select Cloud Services

3. Sign in to your cloud provider and tap "Allow" when prompted.

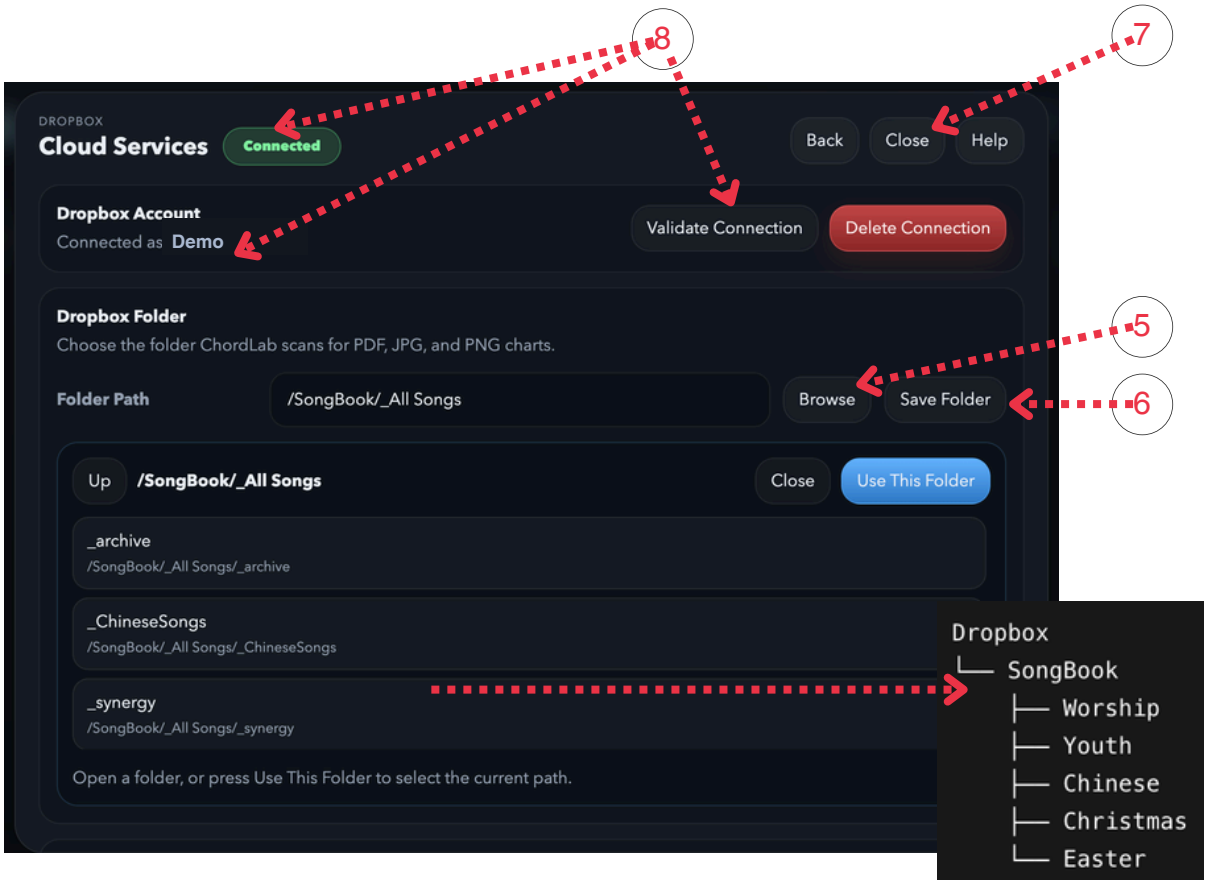

4.Once you have successfully signed in, Chordasy Cloud Services will automatically initialize and synchronize your chart library

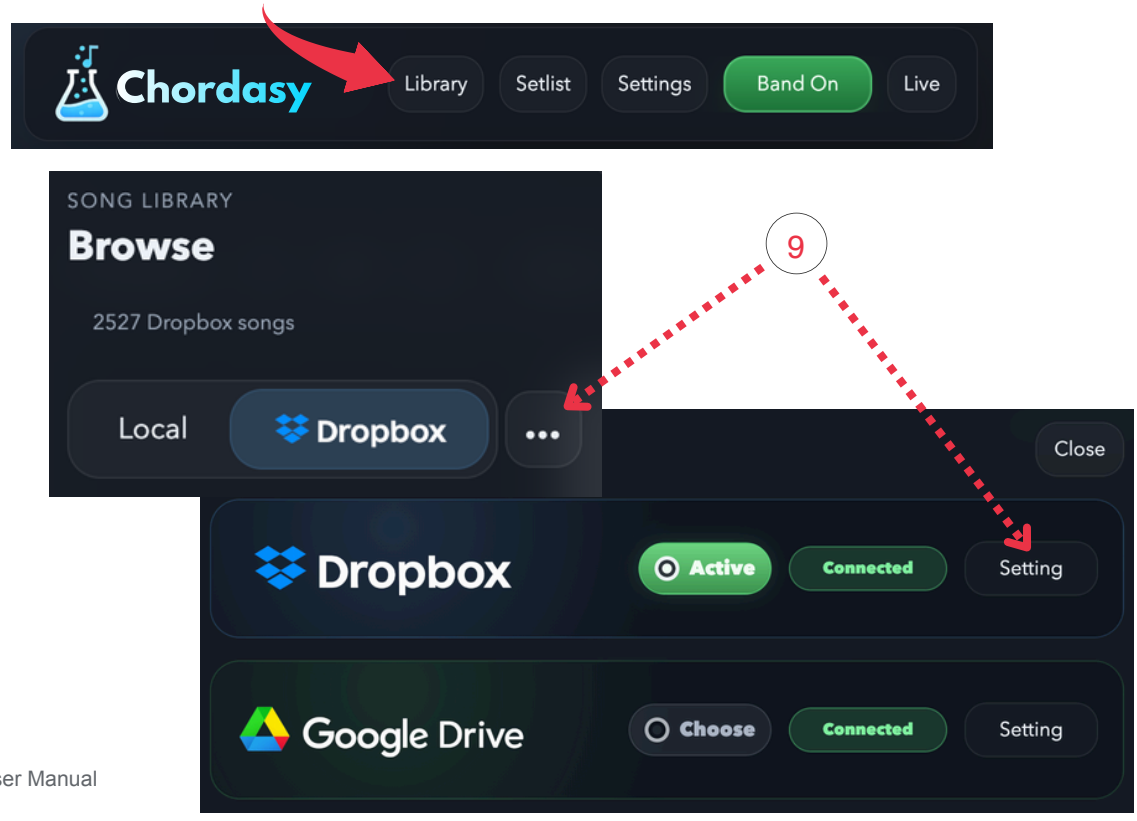

# Chapter 2

## Cloud Services

5. Browse to the folder containing your chord charts and save the folder location for future access.
6. Tap "Save Folder".
7. Close the Cloud Services window.
8. Verify that the status shows "Connected" next to Cloud Services and on the main menu.

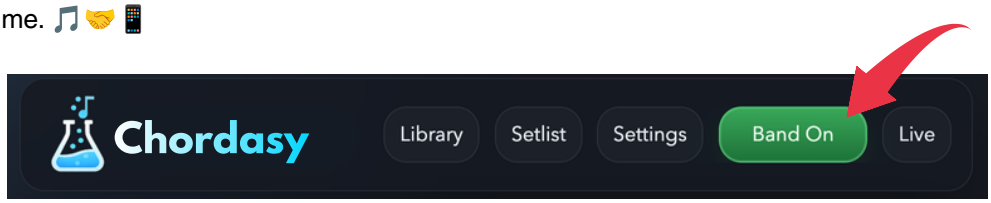

9. Once connected, you can select and use this cloud service within Chordasy.

# Chapter 3
## Band Mode

### Band Mode
Band Mode allows musicians to connect, communicate, and share chord charts with other Chordasy users on the same network.
Whether you're rehearsing, leading worship, or performing live, Band Mode helps keep your entire team synchronized and connected.

Tip 💡
For the best Band Mode experience, ensure all devices are connected to the same Wi-Fi network before scanning for members.
Once connected, musicians can instantly share chord charts, synchronize setlists, and collaborate in real time. 🎵🤝📱

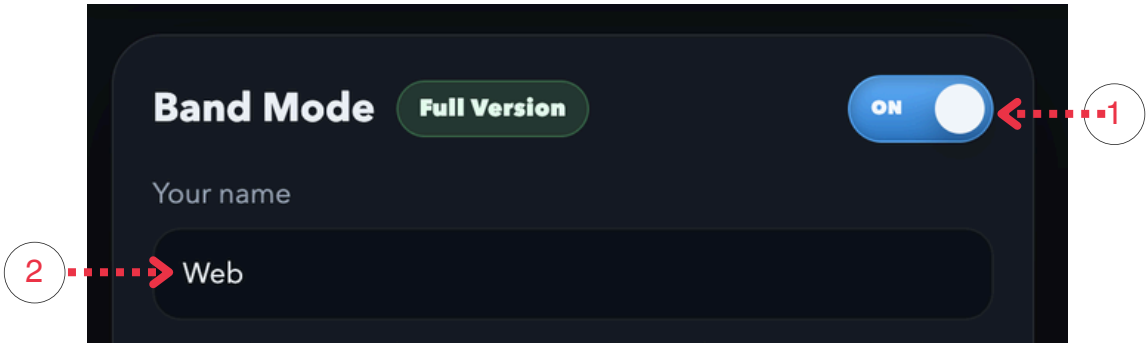

### ① Band Mode Switch
Enable or disable Band Mode.
When Band Mode is turned **on**:
- Your device becomes discoverable by other Chordasy users.
- You can send and receive chord charts.
- Team messaging and chart synchronization become available.
- Other musicians can identify and connect to your device.

When Band Mode is turned **off**:
- Your current online member list is cleared.
- Any suspended member list is also reset on this device.

### ② Your Name
Set your display name.
This is the name other musicians will see when:
- Discovering your device
- Receiving charts from you
- Viewing member lists
- Exchanging messages

*Examples*
- *Keyboard*
- *Guitar*
- *Bass*

*Choose a name that clearly identifies your role within the team.*

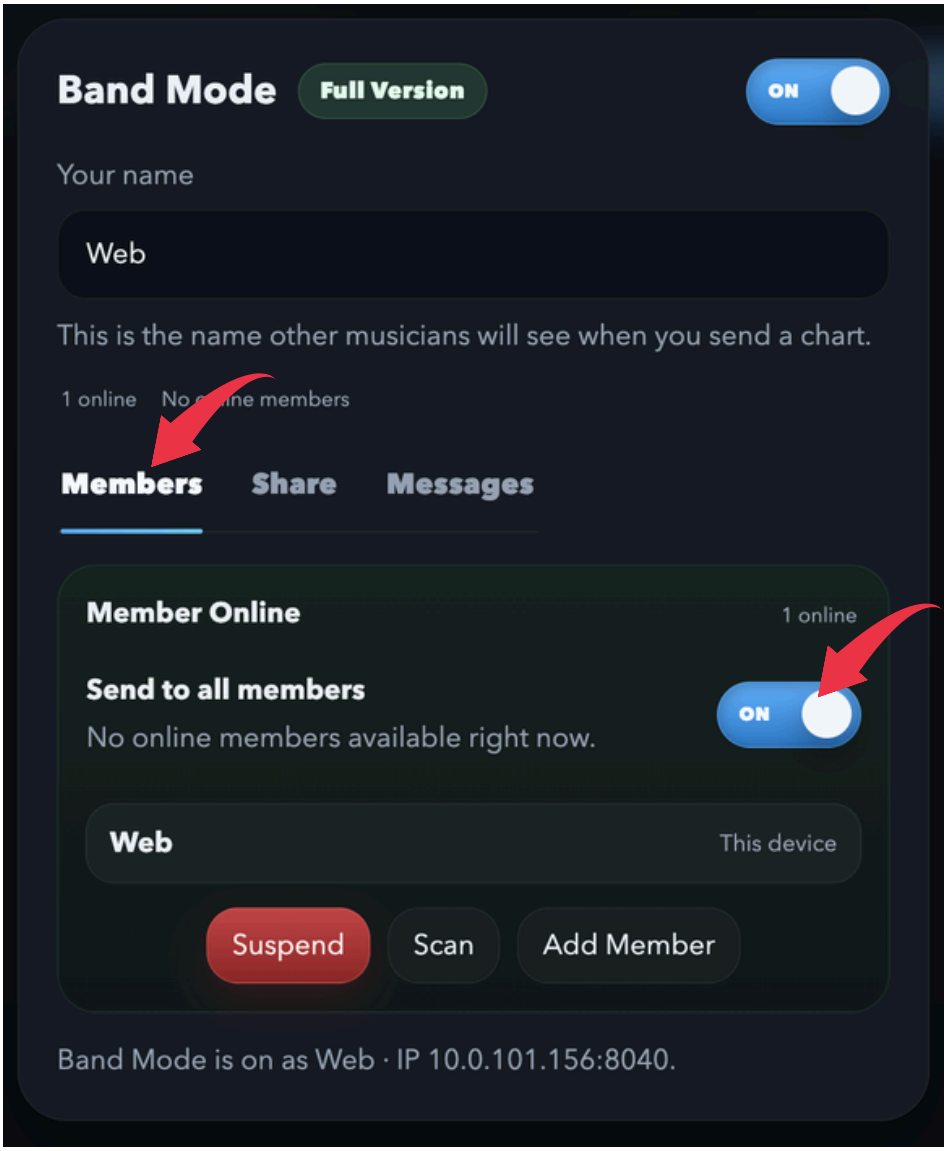

# Chapter 3
## Band Mode

### Share Charts and Messages

Band Mode now supports a simpler sending workflow with a Send to all members toggle inside the member panel.

- When Send to all members is **ON**, charts and broadcast messages go to every connected member
- This toggle is **ON** by default, so new sessions can start sharing immediately.
- When Send to all members is **OFF**, only the members you select will receive the chart or message.
- If the toggle is **OFF** and no member is selected, Chordasy shows a warning so you can select a member or turn Send to all members back on.

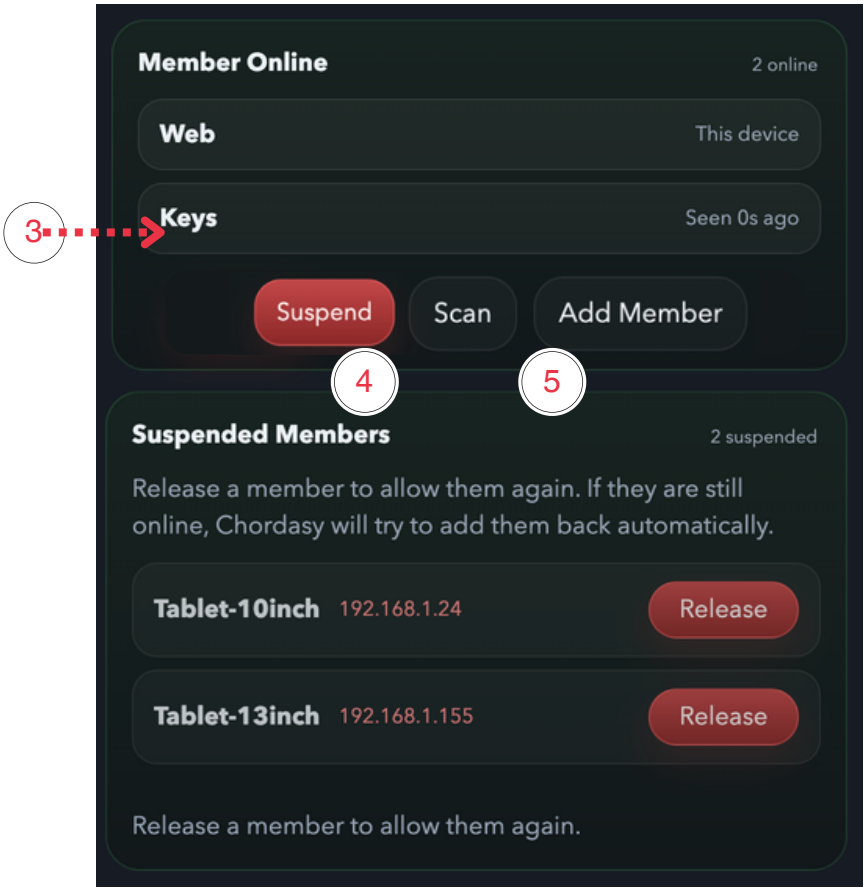

# Chapter 3
## Band Mode

### ③ Member Online
View all connected Chordasy members.
The Member Online section displays:
- Connected musicians
- Device names
- Online status
- Available members for chart sharing
- This helps you quickly identify who is currently available within your band.

### ④ Scan
Discover nearby Chordasy members.
Tap Scan to search for other Chordasy users on the same local network.
Chordasy will automatically detect available members and add them to the online member list.

### ⑤ Add Member
Connect manually using an IP address.
If automatic discovery is unavailable, you can manually add another member by entering their IP address and connection details.
- Complex network environments
- Different network segments
- Troubleshooting connection issues

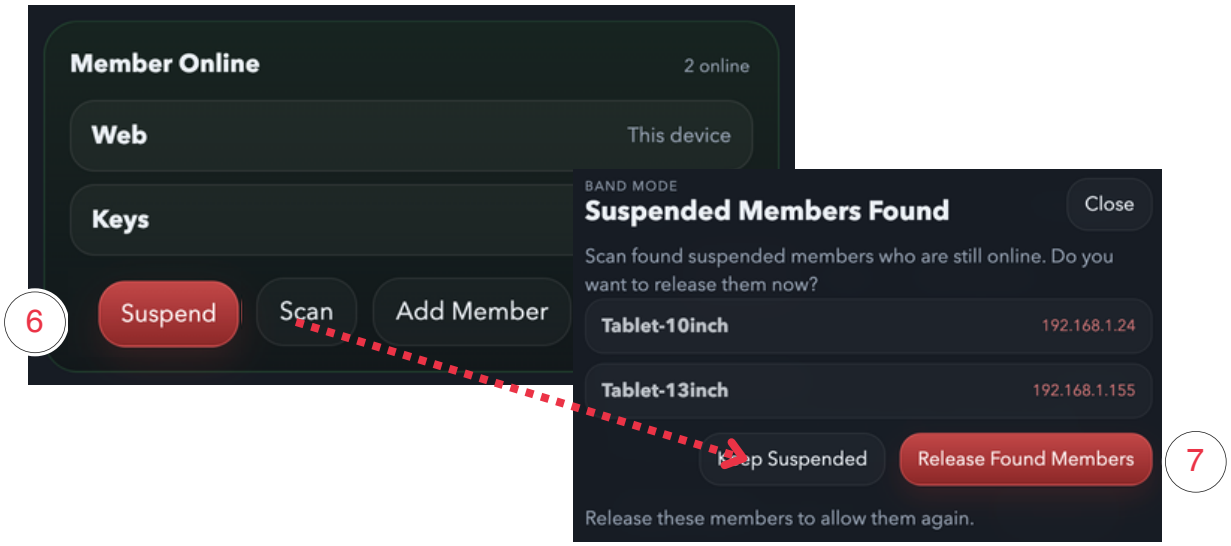

# Chapter 3
## Band Mode

### ⑥ Suspend Member
Temporarily block a connected member on this device.
Use this option when:
- A member should no longer be able to send charts or messages to you
- You want to hide that member from your active member list
- You need to stop incoming sharing from a specific device

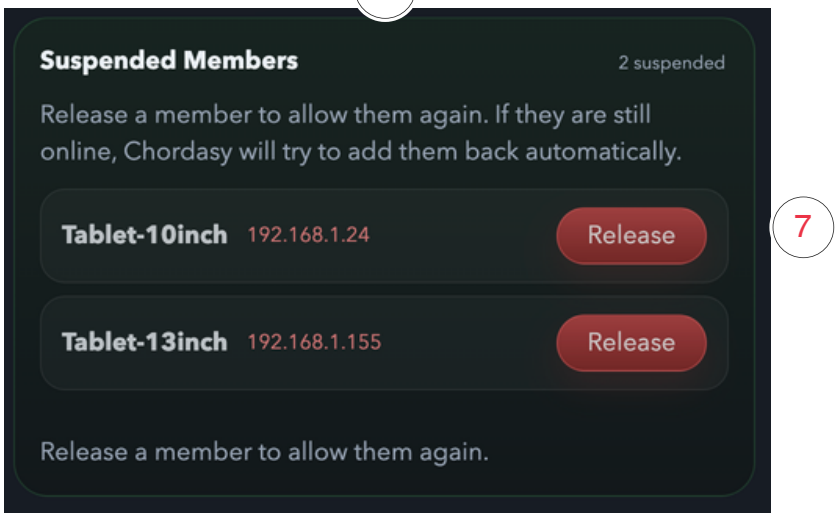

Suspending a member will:
- Remove them from your current member list
- Block incoming charts and messages from that device
- Cause future sends from that member to be rejected on your device

This does not delete any charts or data.

### ⑦ Release Member
- To allow that member again later, use Add Member, Release in the Suspended Members list, or turn Band Mode off to clear the suspended list.

Or

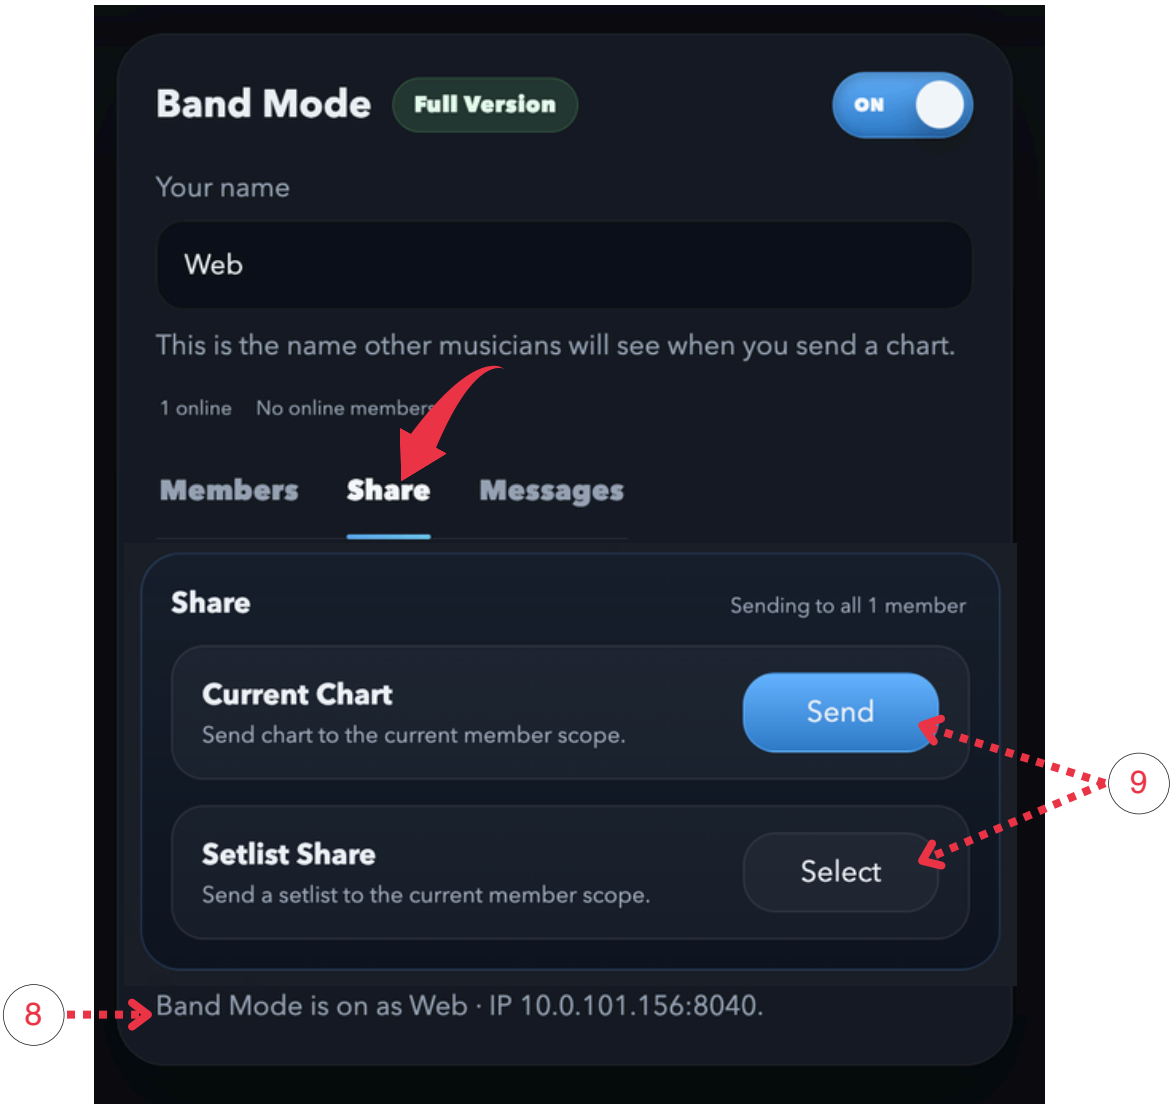

# Chapter 3
## Band Mode

### ⑧ Connection Status
At the bottom of the screen, Chordasy displays the current Band Mode status, including your display name and network address.
Example:
Band Mode is on as Keyboard · IP 192.168.1.238:8040
This information can be useful when manually connecting devices or troubleshooting network connections.

### ⑨ Send Charts and Setlists
**The Share tab lets you quickly send the current chart or a setlist to other band members.**

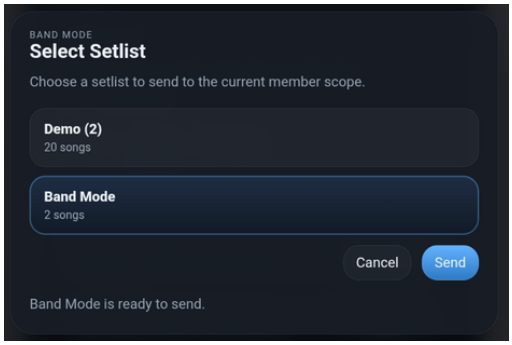

- In Current Chart, the **Send** button shares the currently selected chord chart.
- In Setlist Share, the Select button lets you choose a setlist to send as a text list. Other band members will receive it as a guided import reference, and Chordasy will try to match each item from Local and cloud storage.
- If Send to all members is ON, charts and setlists are sent to all connected members.
- If Send to all members is OFF, charts and setlists are sent only to the selected member.
- This helps keep all musicians synchronized during rehearsals and live performances.

# Chapter 3
## Band Mode

### Setlist Share

### Sender
In Setlist Share, the Select button lets you choose a setlist to send as a text list. Other band members will receive it as a guided import reference, and Chordasy will try to match each item from Local and cloud storage

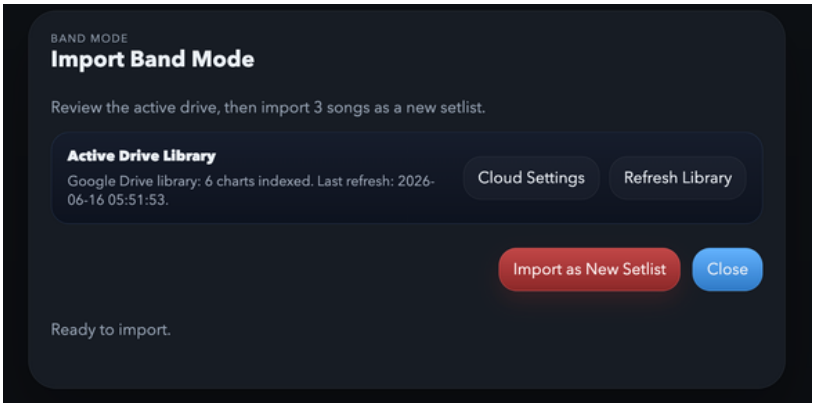

### Receiver
The imported chart serves as a reference during guided import. Use Show Preview to display or hide the chart preview. When you are ready, click **Import** to start importing the matched chart.

### Import Dialog
When the Import dialog is opened, users can switch between different cloud drives to match files for import. Use Refresh Library to retrieve the latest library content from the selected cloud drive, ensuring accurate and up-to-date search results.

click **Import** as a New Selist to start the Matching and it will save the Found item to the Local Setlist

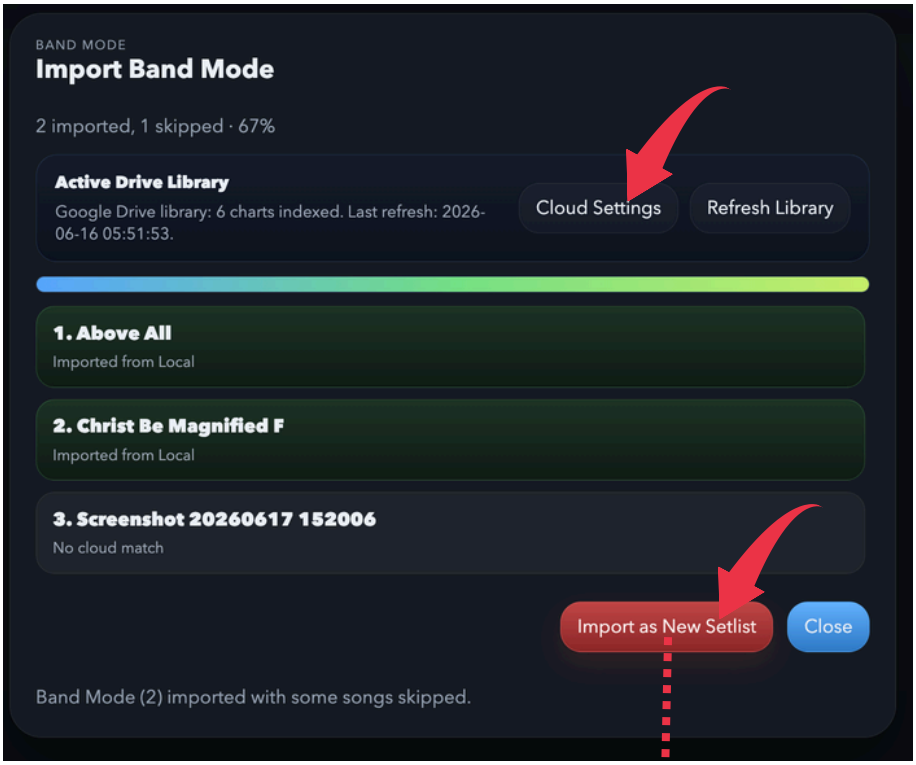

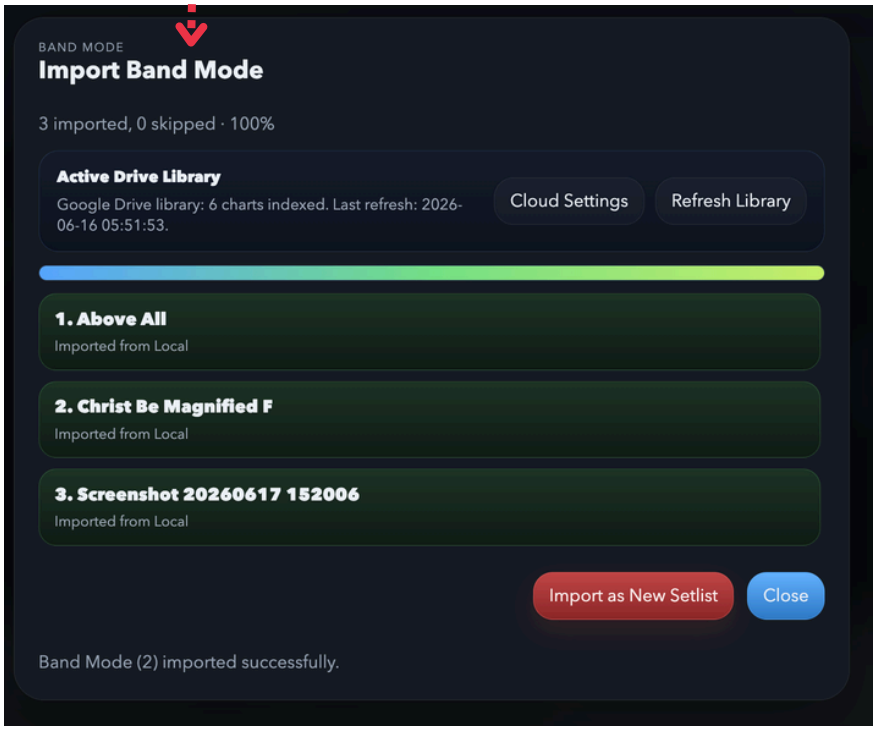

# Chapter 3
## Band Mode

### Result Dialog

Displays the import results for all charts. If some charts are missing, users can switch to another cloud provider through Cloud Settings and run the import again.

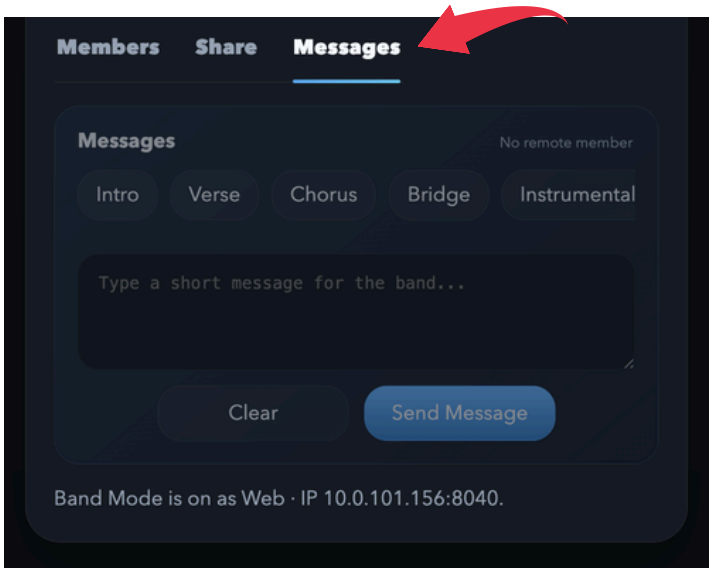

Clicking **Import as New Setlist** will search for the charts again and add any newly found items to the current setlist. Existing imported charts will remain unchanged.

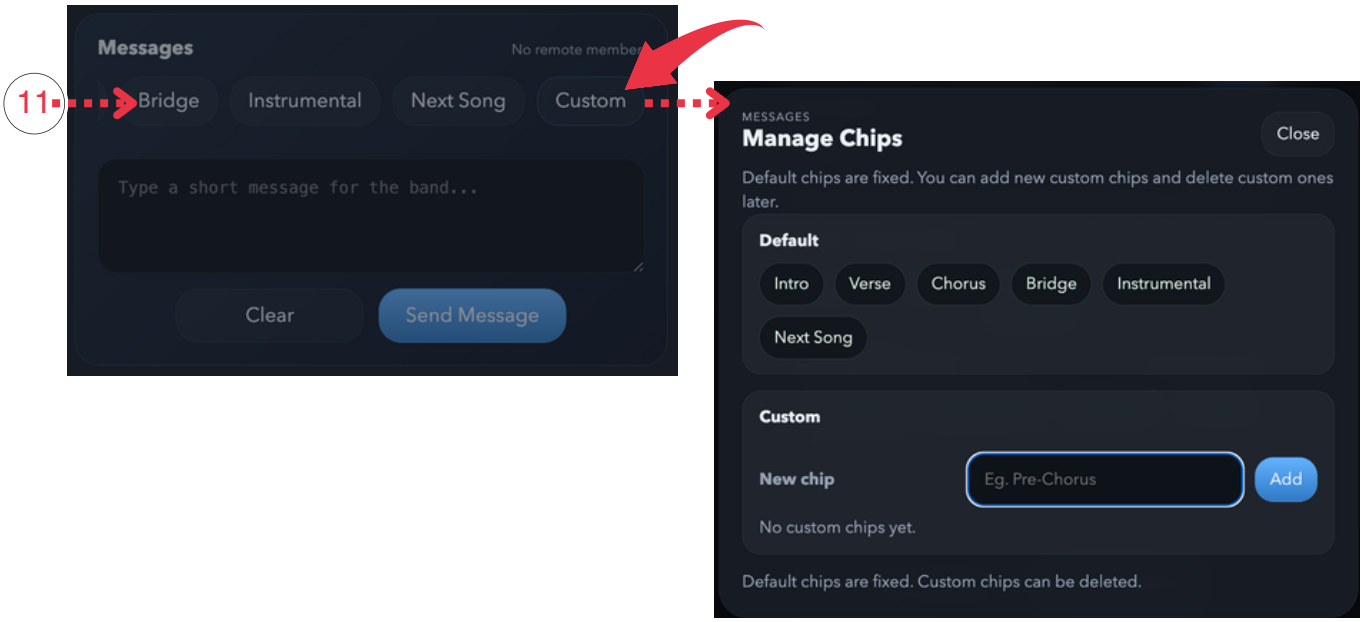

# Chapter 3
## Band Mode

### ⑩ Messaging
Broadcast Messaging lets you send a text message without leaving Chordasy.
• With Send to all members ON, the message goes to all connected members at once.
• With Send to all members OFF, only the selected members receive the message.
• Use it to quickly communicate song changes, rehearsal notes, or performance instructions.

### ⑪ Preset and Custom Message Chips
Preset and Custom Message Chips help you send common messages faster during rehearsal or live performance.
• Preset chips include commonly used labels such as Intro, Verse, Chorus, Bridge, Instrumental, and Next Song.
• Tap any chip to instantly place that message into the message box.
• Use the Custom chip to open Manage Chips, where you can add your own message chips.
• Preset chips cannot be edited or deleted.
• Custom chips can be deleted at any time.
• Use message chips to quickly send section cues, reminders, or short instructions to band members.

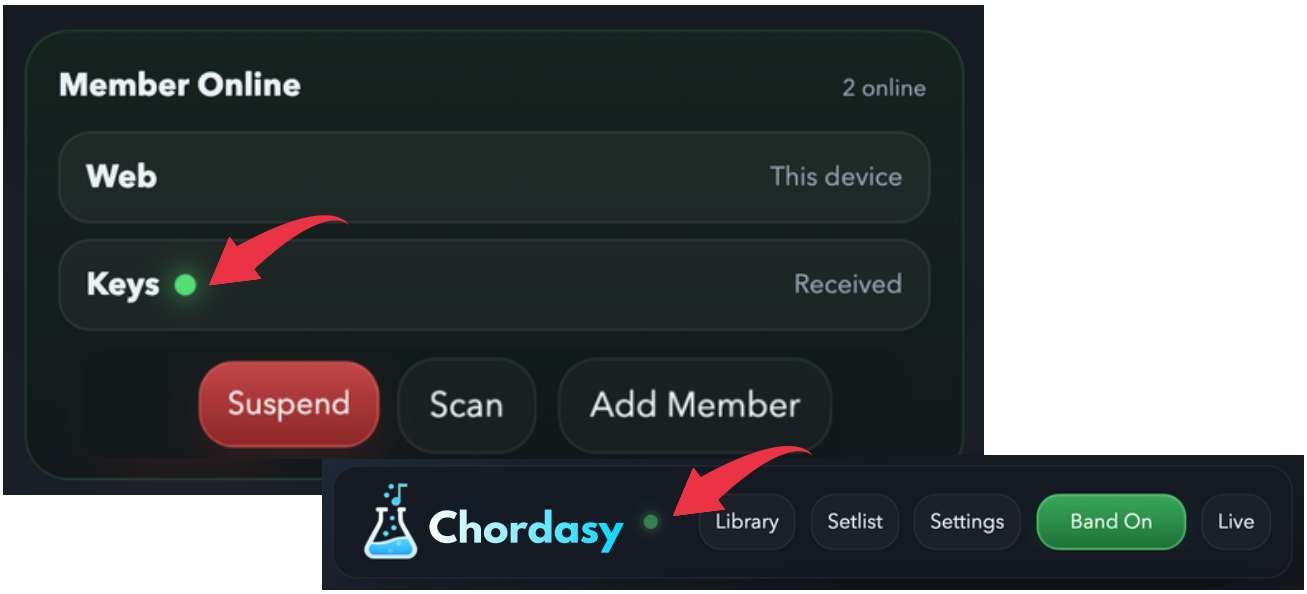

# Chapter 3
## Band Mode

### Notifications & Status Indicators

When a chart or message is sent or received, Chordasy will display status indicators and notifications next to the Chordasy logo and within the Member Online list.
These indicators provide real-time feedback on communication and synchronization activities between connected members.
Examples include:

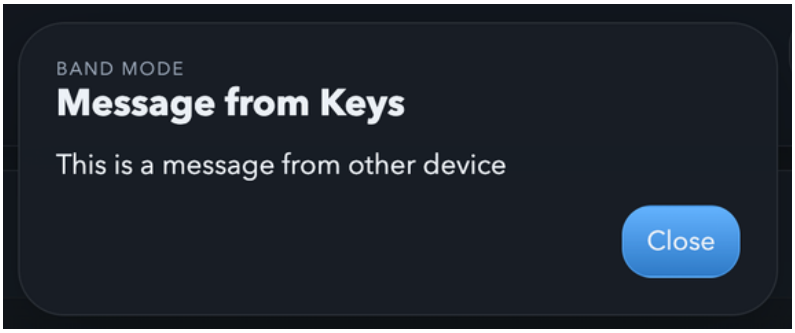

- Chart Sent
- Chart Received
- Message Received
- Member Connected
- Member Disconnected

This allows musicians to quickly confirm that charts and messages have been successfully delivered during rehearsals and live performances.

### Broadcast Message Notifications

When a broadcast message is received, Chordasy will display a popup notification to alert the user.
This helps ensure important messages are noticed during rehearsals and live performances.

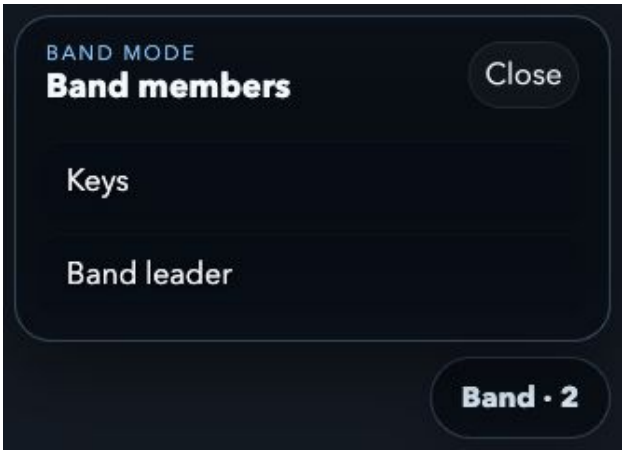

# Chapter 3

## Band Mode

## On-Screen Band Member Button

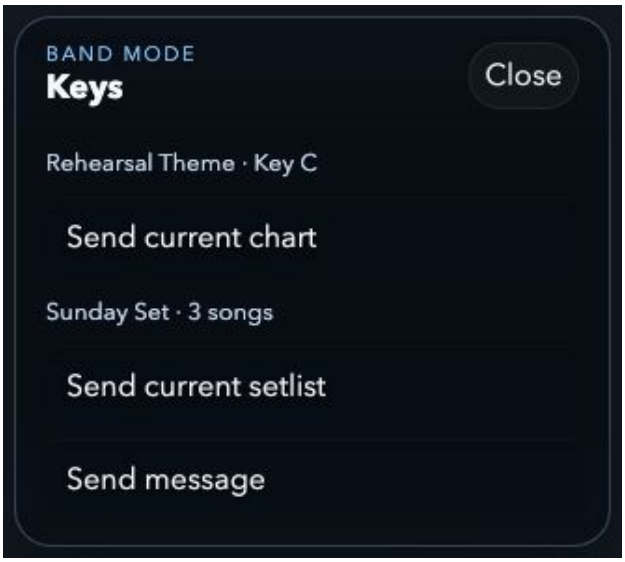

The floating Band button gives you direct access to connected members in Edit and Live Mode, while your current chart stays open.

**1. Choose a connected member**

Tap Band, then choose a member. The list shows connected members.

**2. Choose a sharing action**

Example interface with sample names.

### Send current chart

Send the chart you are viewing to the selected member, including supported annotations.

### Send current setlist

Select a setlist first. This action sends its running order and matching information as a guided import reference, rather than transferring every chart file. The receiver matches songs in their own Local or cloud library; see Setlist Share earlier in this chapter.

### Send message

Open the message composer, type your note and choose Send. Use Close to return without sending.

### Move or hide the shortcut

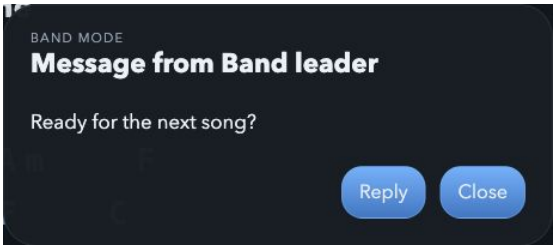

Drag the Band button to a comfortable position. It works in Edit and Live Mode. To hide or show it, use Settings > Band Mode - Floating shortcut; see Chapter 4, page 24.

# Chapter 3

## Band Mode

### Reply to an Incoming Message

Reply directly to the original sender in the incoming message area. Replying is optional, and the chart remains visible while you write.

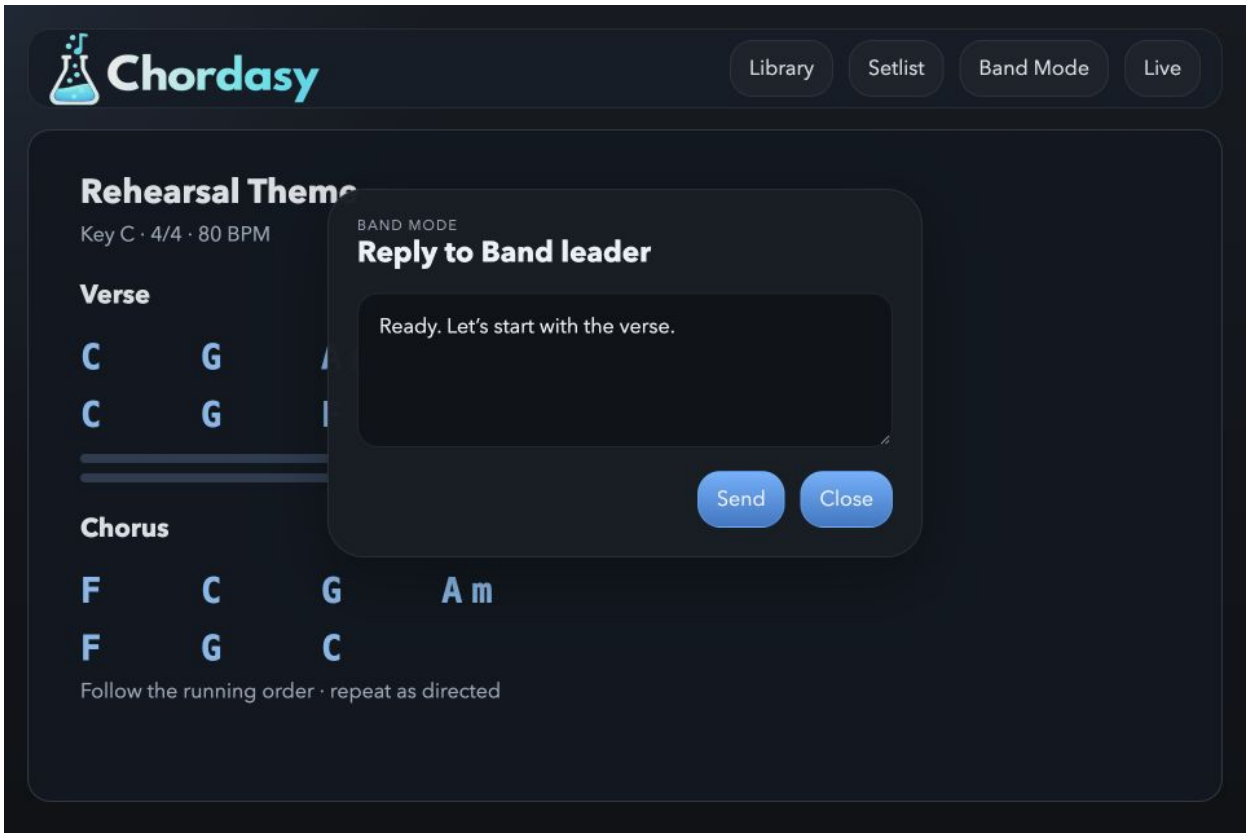

#### 1. Tap Reply

When a text message arrives, tap Reply. The original sender is selected automatically.

#### 2. Type your response

The composer replaces the message content in the same area. Continue following your chart as you reply.

Example interface: the reply uses the message area and leaves the chart in view.

#### 3. Send or Close

Choose Send to reply, or Close to return to the original message without sending. If delivery is delayed or fails, check the status before trying again.

**Basic Band Mode allowance**

Basic includes seven complimentary sends on this device. Replies share this allowance with other Band Mode sends. Once it is used, an unlock is required to send, including replies. Receiving does not use a send.

# Chapter 4

## Chordasy Settings

**① PDF First Page Only**
When enabled, Chordasy displays only the first page of each chart.
This allows page navigation to move directly to the next song in the setlist, making live performances smoother and reducing unnecessary scrolling.

**② Band Mode – Chart Auto-Open**
When enabled, received chord charts open automatically as soon as they are received.
When disabled, Chordasy shows a confirmation notification before opening the chart.
This is useful for musicians who prefer to review incoming charts manually.

**③ Night PDF Mode**
When enabled, Chordasy displays PDF charts in a dark-style view by inverting light backgrounds into dark backgrounds.
This can make charts more comfortable to read in low-light environments such as rehearsals, live stages, or performances.
This setting applies only to PDF charts and does not affect image charts or annotations.

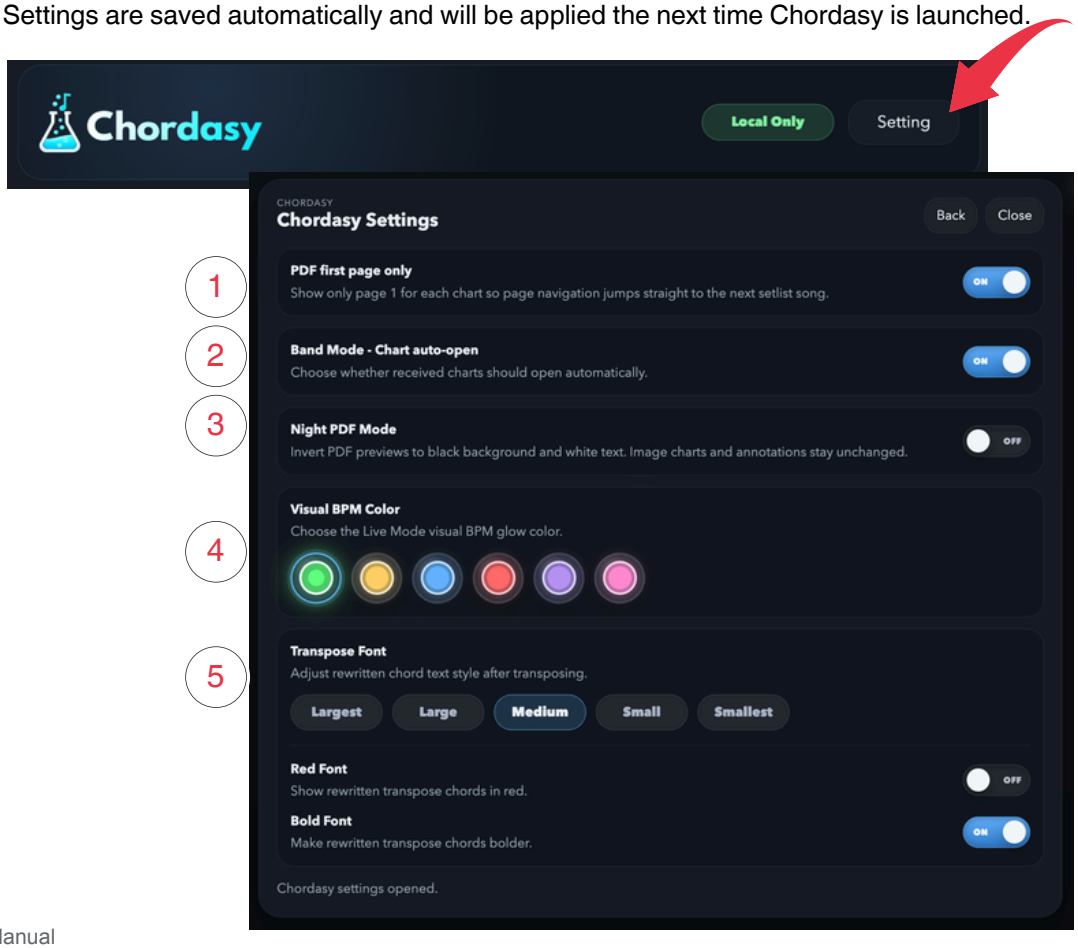

**④ Visual BPM Color**
Customize the visual BPM indicator color used in Live Mode.
The selected color is shown when BPM information is displayed, helping musicians quickly identify tempo cues during rehearsals and performances.
Choose a color that best matches your preference or stage environment.

**⑤ Transpose Font**
Adjust the appearance of transposed chord text.

- 5 font size Available
- Red Font – Displays transposed chords in red for clearer visual distinction.
- Bold Font – Makes transposed chords appear bolder and easier to read.

Select the combination that gives you the best balance between readability and chart visibility.

💡 Tip: Settings are saved automatically and will be applied the next time Chordasy is launched.

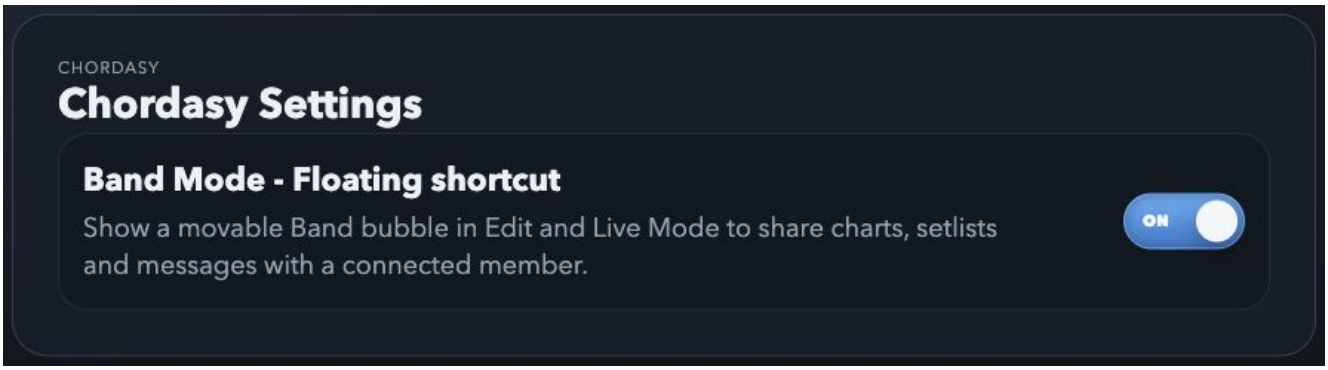

# Chapter 4

## Chordasy Settings

### 6. Band Mode - Floating Shortcut

Use this setting to show or hide the movable Band button. Open Settings, then find Band Mode - Floating shortcut.

The setting controls the shortcut in both Edit and Live Mode.

#### On: Show the shortcut

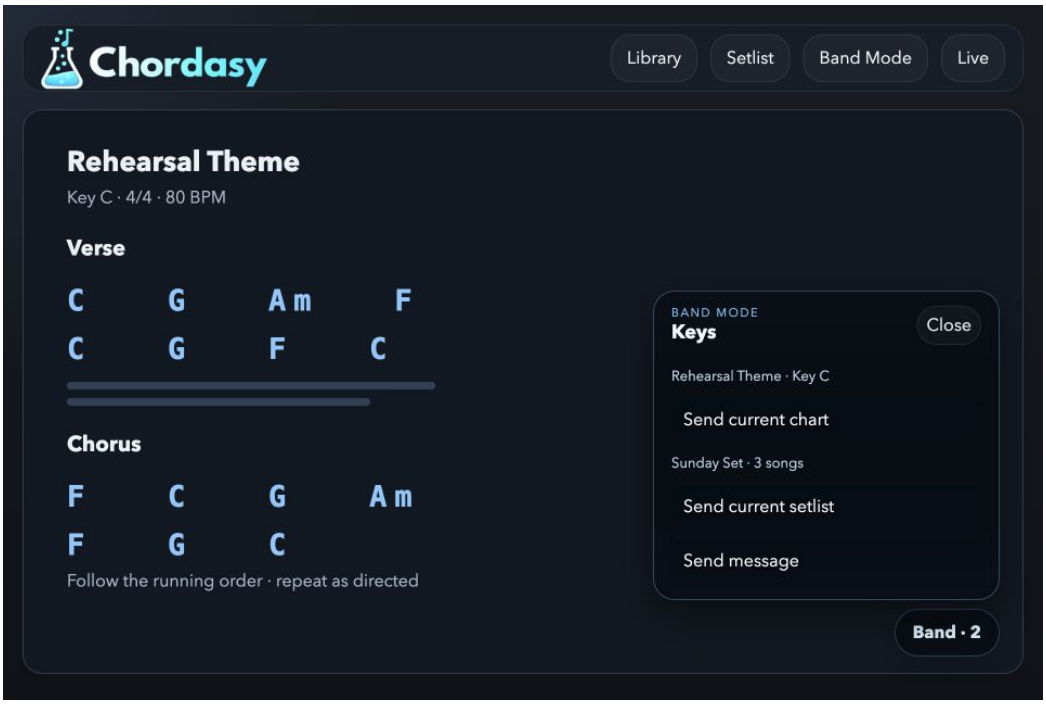

When Band Mode is on, the Band button is available on screen. Tap it to choose a connected member and share a chart, setlist or message.

#### Off: Hide the shortcut

The button is hidden. This setting does not switch Band Mode off; use the Band Mode switch when you want to end Band Mode.

#### Positioning the button

The button starts near the bottom-right corner with space around it. Drag it to a comfortable position below the menu bar, leaving your chart readable.

# Chapter 5

## Setlist Management

### Setlist Management

The Setlist Manager allows you to organize songs into structured setlists for rehearsals, worship services, and live performances.
Using setlists helps musicians quickly navigate between songs and ensures the entire team follows the same performance order.

### ① Current Set

The Current Set panel displays the active setlist currently selected in Chordasy.
All songs within the selected setlist will be available for quick access during rehearsals and live performances.

### ② New Setlist

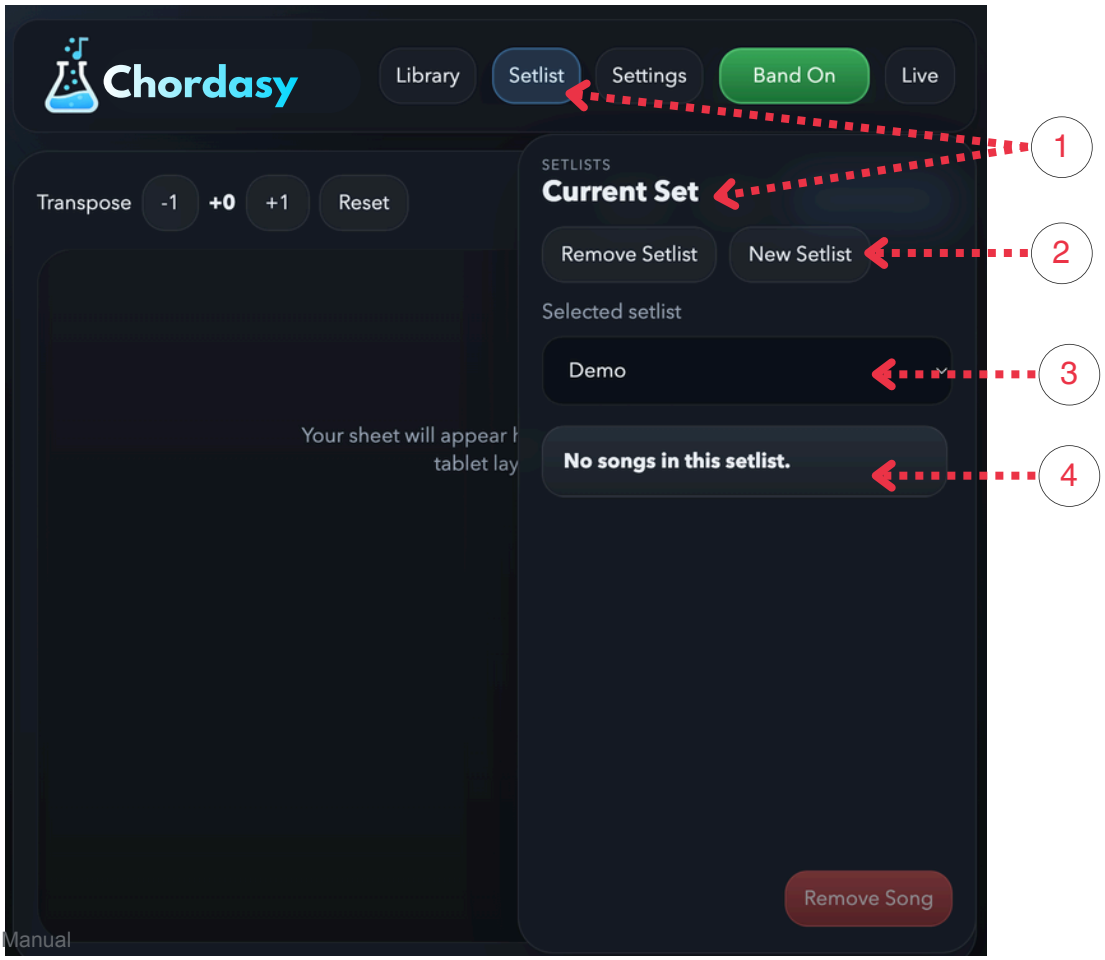

Click New Setlist to create a new setlist.
Setlists can be created for different events, such as:
Sunday Worship
Youth Service
Band Rehearsal
Special Events
Concert Performances

### ③ Selected Setlist

Use the dropdown menu to select and switch between existing setlists.
Once selected, all songs belonging to that setlist will be displayed in the song list area.

### ④ Song List

The Song List displays all songs currently assigned to the selected setlist.
Selecting a song will immediately load the corresponding chord chart into the chart viewer.

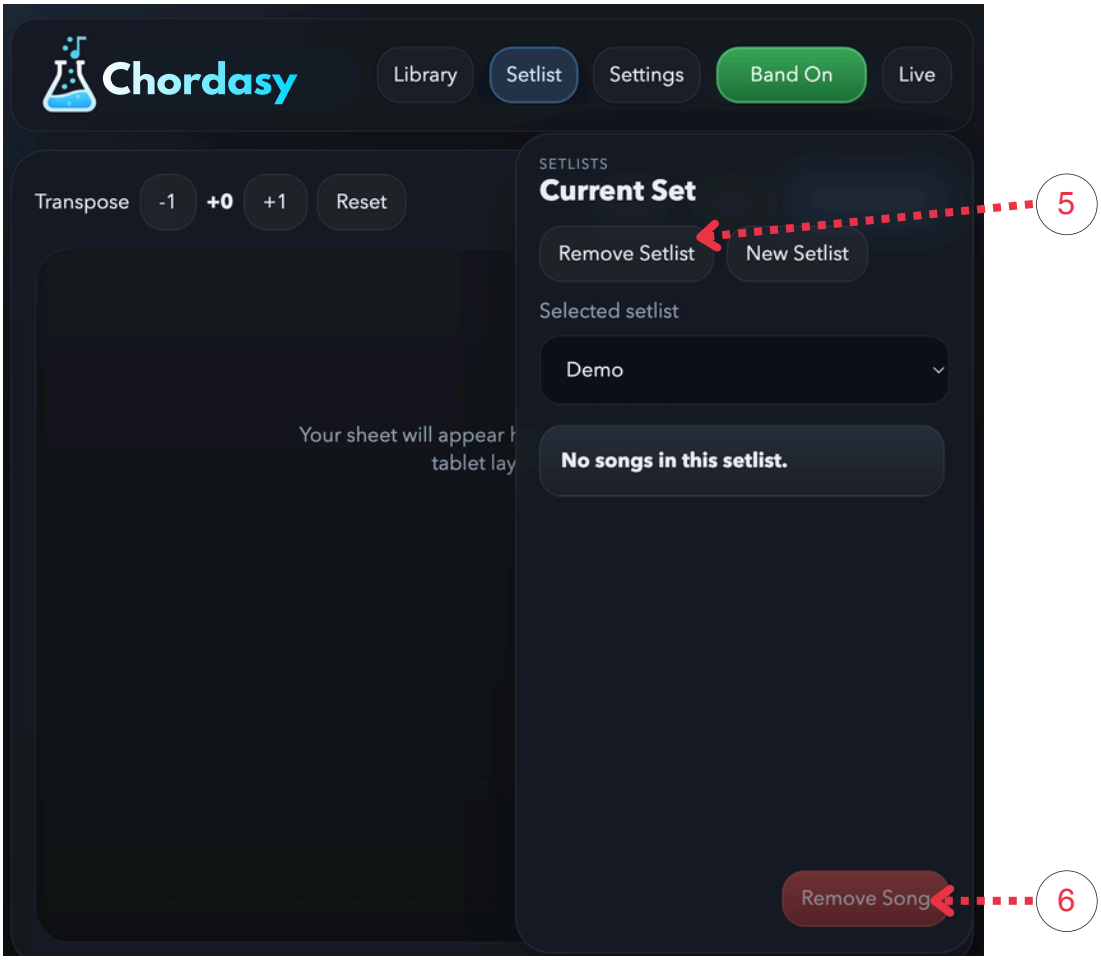

# Chapter 5
## Setlist Management

### ⑤ Remove Setlist
The Remove Setlist button permanently removes the selected setlist.
Only the setlist is removed. The original chord charts stored in your library will remain unchanged.

### ⑥ Remove Song
The Remove Song button removes the selected song from the current setlist.
The chart itself remains in your library and can be added back to any setlist at any time.

🎵 Tip
Create separate setlists for different services, events, or rehearsals to keep your music organized and easily accessible.
A well-organized setlist helps musicians transition smoothly between songs and stay focused during live performances.

# Chapter 6

## Live Performance Mode

### Live Mode

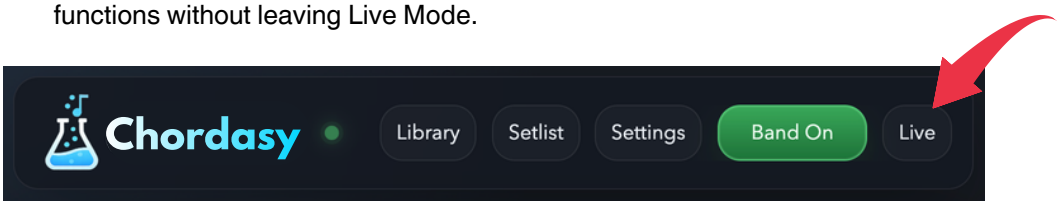

Live Mode is designed specifically for rehearsals, worship services, and live performances.
To enter Live Mode, simply tap the Live button from the main navigation bar.
Once activated, Chordasy switches to a distraction-free viewing experience, allowing musicians to focus entirely on the performance.

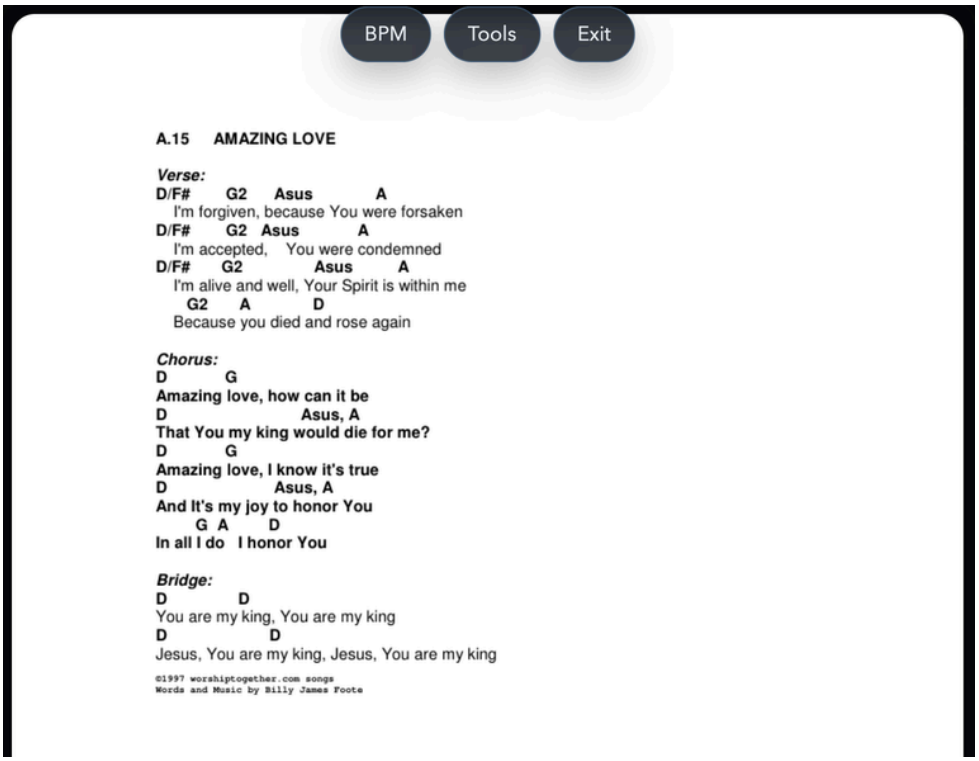

### 🎼 BPM Display

Tap the BPM button to view tempo information and visual BPM indicators.
This helps musicians maintain a consistent tempo throughout the song.

### 🛠️ Tools

The Tools menu provides quick access to additional chart and performance functions without leaving Live Mode.

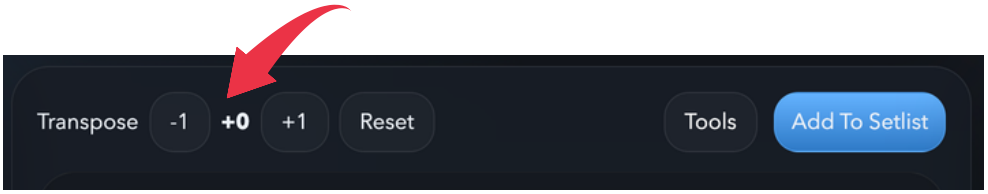

# Chapter 6

## Live Performance Mode

### Transpose

Transpose now follows clearer musical spelling so key changes are easier to read during rehearsal
and live performance.

- The transpose controls support a range from -11 to +11 semitones.
- **Positive** transpose uses sharps: C > C# > D > D# > E > F > F# > G > G# > A > A# > B.
- **Negative** transpose uses flats: C > B > Bb > A > Ab > G > Gb > F > E > Eb > D > Db.
- Reset returns the chart to its original key.
- Examples: C -2 becomes Bb, and E -1 becomes Eb.

**Instrumental 1**

B / F# / | C#2/F / D#m / | B / F# / | C#sus / C#

**Chorus 1**

B F# C#/F D#m
Bless the Lord, oh my soul, oh my soul
B F# C#sus C#
Worship His holy name
B D#m7 B C# D#m7
Sing like never be - fore, oh my soul
B C# B/F# F# / | B/F# C#/F# F#
I worship Your holy name

**Verse 1**

B F# C# D#m7
The sun comes up, it's a new day dawning
B F# C# D#m7
It's time to sing Your song a- gain
B F#
What - ever may pass and
C#/F D#m7
What - ever lies be - fore me
B F# C#sus C#
Let me be singing when the ev' - ning
F# / / B/F# | F# / /
Comes

**Chorus 2**

B F# C#/F D#m
Bless the Lord, oh my soul, oh my soul
B F# C#sus C#
Worship His holy name
B D#m7 B C# D#m7
Sing like never be - fore, oh my soul
B C# B/F# F#
I worship Your holy name

**Instrumental 2**

B / F# / | C# / D#m / | B / F# / |
C#sus / C# / | B / D#m7 / | B C# D#m7 / |
B / C# / | F#5 / /

**Verse 3**

B F# C#/F D#m7
And on that day when my strength is failing
B F# C# D#m7
The end draws near and my time has come
B D#m7
Still my soul will
C#/F D#m7
Sing Your praise un-ending
B F# F#/C# C#
Ten thousand years and then for - ev - er
F# / / / | / / /
More

# Chapter 7
## Troubleshooting & FAQ

### Frequently Asked Questions

**Q: Why can't I find another member?**
Ensure Band Mode is enabled
Ensure both devices are on the same Wi-Fi network
Try using Add Member manually

**Q: Why is my chart not opening?**
Verify the chart format is PDF, JPG, or PNG
Confirm the cloud folder has been selected

**Q: Why is cloud synchronization not working?**
Verify your cloud account is connected
Use Validate Connection

# Appendix
